

DYNAFLASH®
EAVES FLASHING

DynaFlash® Eaves Flashing is a flexible polymer-based eaves flashing designed for use at the roof edge to assist with the management of moisture and protection of the roof structure. Manufactured in New Zealand, the product is supplied in continuous rolls (25m) and can be cut to the required length on site, reducing waste and eliminating the need for joins.

DynaFlash® Eaves Flashing is designed to meet the eaves flashing requirements of NZBC Acceptable Solution E2/AS1 and has been independently assessed under BRANZ Appraisal No. 913.

Quality Assurance

Product batch testing is undertaken through established quality control processes in accordance with the applicable manufacturing standards at the site of manufacture.

Dynex is certified to both ISO 9001 and ISO 14001, demonstrating its commitment to quality management and environmental stewardship.

Installation

Refer to **DynaFlash Eaves Installation Guide**.
